"for tools and parts that fix!"

Castrol Premium Heavy Duty is a NLGI 2 multipurpose lithium complex grease for automotive and industrial applications. It has been formulated with a high drop point, good water resistance and EP properties for greater high temperature performance and load carrying capabilities. The inclusion of a tacky agent helps resist throw off.

Suitable for automotive wheel bearings, ball joints and chassis lubrication as well as medium duty industrial applications. The TOLEDO TOL305217 lever action grease gun is suitable for use with 450gm cartridges or bulk grease (650cm3 capacity with bulk grease). Generates 6000psi pressure, comes **FREE** with a heavy duty 4 jaw coupler and a 150mm (6 inch) rigid extension.

It's back again! Buy a box of 12 grease cartridges & get a FREE grease gun

**SCHNORR® HDS LOAD
WASHERS**
Specially developed for high strength bolts of grades 8.8 - 12.9 and conform to DIN 6796. This represents the most powerful form of safety washer in the form of a disc spring. The washer loads are matched to 70 - 90% of the bolt load in the flat state. Advantages of the HDS washers are: High axial load, optimum compensation for setting in the joint, reduction of the dynamic loading of the bolt, uniform concentric loading and high safety through a high degree of spring action. Suitable for captive fitting on a wide range of bolts

SCHNORR®
DISC SPRING ENGINEERING

We now have in stock a wide range of Schnorr® VS safety washers sizes 4mm, 5mm, 6mm, 8mm, 10mm, 12mm, 14mm, 16mm, 20mm, 24mm and 30mm.

HDS load washers sizes stocked are 5mm, 6mm, 8mm, 10mm, 12mm, 16mm, 20mm, 24mm and 30mm.

For more information see our web site

SCHNORR®
DISC SPRING ENGINEERING

**SCHNORR® VS SAFETY
WASHERS**
The original Schnorr VS safety washers are in the form of a disc spring but with a trapezoidal cross section and serrations on both sides. The outer diameter of the washer is matched to the head diameter of socket head cap screws. Advantages of the VS washers are: High vibration resistance due to positive locking of the serrations, uniform axial loading eliminates bending torques and deformation of the bolt stem, serration design prevents friction and component damage when tightening, closed ring form gives a high degree of pre-tensioning avoiding burst open effect
